SCA SCORE

85.0

About the farm

At Fazenda São Pedro, the Ignácio family is deeply committed to environmental preservation. The farm is a source of six natural springs, and the family has deliberately selected the highest areas of the land for crop cultivation to protect these water resources.

This careful placement, combined with sustainable agricultural practices, ensures the production of high-quality coffee while actively conserving the local ecosystem.

About +55 coffee hub

+55 coffee hub was founded to showcase the rich diversity of Brazilian specialty coffee. Ever since, we have striven for the best quality and sustainable and fair ways of cultivating, processing, and bringing coffee into the world.
