88.5

About the farm

The family-run Fazenda Rodomunho is led by Thiago Corsi, now in its fourth generation. Since 2019, Thiago has been innovating the production of specialty coffees by implementing regenerative practices that restore soil health and preserve local ecosystems. The farm's location on a high plateau surrounded by springs and rivers creates a unique micro-climate that provides ideal conditions for producing high-quality coffee.

About +55 coffee hub

+55 coffee hub was founded to showcase the rich diversity of Brazilian specialty coffee. Ever since, we have striven for the best quality and sustainable and fair ways of cultivating, processing, and bringing coffee into the world.
